

## JBL NIGHTLIFE SERIES

Slim yet powerful, unobtrusive yet gorgeous, the JBL Nightlife represents the future of home audio/video speaker systems. The Nightlife series was designed to cosmetically blend into your décor and lifestyle, all the while filling your room with lifelike, enveloping sound from your favorite movies and music.

Rounded, black gloss cabinet

Industrial audiophile spikes

### 1" PRECISION SOFT DOME TWEETER AND EOS WAVEGUIDE

A 1" synthetic dome material is injected with multiple polymers for strength, fitted with strong magnets for tremendous power handling, and fitted into a Dispersion Guide to spread the sound throughout the room.

### POLYBASS DRIVERS

Paper cones, known to possess the most natural sound of all driver materials, are reinforced with a proprietary copolymer that provides additional stiffness and damping to the cone surface. This provides the listener with tighter bass and extended low frequencies without breakup and distortion.

### FREEFLOW PORT ARCHITECTURE

This type of port extends low frequency response by coupling internal air motion to a computer-designed aperture with a flared shape, allowing maximum air flow without audible port noise. The result is room filling bass from an attractive, slim speaker.

### ULTRA SLIM DESIGN

The rigid MDF cabinet is only 3" deep, making it the perfect cosmetic and acoustic complement to your flat screen tv.
